40
YEARS
BIKE MOTIVATION

HAPPY BIRTHDAY SIGMA!

In 1982, the German electronics pioneer Klaus-Peter Schendel launched the first-ever digital bike computer: the Cyclecoach. Almost 40 years later, SIGMA continues to offer cyclists ground breaking products like its GPS bike computers, smartphone apps and lighting.

The introduction of a new brand logo in early 2021 signalled the beginning of a number of activities aimed at strengthening the company's future position and actively helping to design the mobility revolution. Proof of this are the three new GPS bike computers launched from the ROX family this year and the "EOX VIEW 1300" e-bike display is now available from dealers.

This is just the beginning; Starting autumn 2021, new lighting systems will ensure more safety and visibility on and off the street and the new SIGMA ORIGINALS will reenergize the bike computer market.

Partner with us in outfitting your customer's bikes with our ground breaking technology. Let's enjoy the ride together!

Your SIGMA team

A TRADITION OF SERVICE EXCELLENCE

“We are passionate about customer satisfaction”

Consistent and goal-oriented: SIGMA is applying the knowledge it has gained over almost 40 years of research and development not only to its products, but also to customer service. A passion for sport and mobility, feedback from professional athletes, and proactive cooperation with distributors and customers is our highest priority.

Proven diligence and a consistently friendly, professional approach to customer service requests are part of our core values and guarantee our continued success. These are the very values that our customer service embodies every day.

Our customer service consists of a young, dedicated team based in Neustadt an der Weinstraße, Germany that processes customer queries from a number of countries around the world.

Many of our service team staff have combined their hobby with their career and spend many hours each week outdoors biking and running. Our passion and knowledge of sports and technology enables us to offer you expert level service.

Great service also means that we are prepared for as many questions as possible and always ready to listen to our cyclists and dealers. Our service hotline is available during open hours, and we will be happy to help you with whatever questions you may have:

Hotline: +49 (0) 6321 9120 118
Monday-Thursday 8 AM to 4 PM
Friday from 8 AM to 2 PM

You can, of course, write us an e-mail at any time:

service@sigmasport.com

Dennis Glas, Customer Service Team Leader
“We always aim to support every SIGMA user and our dealer to the best of our ability each and every day – we are passionate about customer satisfaction!”
dennis.glas@sigmasport.com

ONLINE SUPPORT

To us, „excellent service” means being prepared to answer any question that a customer may have as well as designing our devices to be as user-friendly as possible. The SIGMA homepage provides a link to a „Frequently Asked Questions” section for almost every product. You can find comprehensive video footage covering installation and operation on our YouTube channel.

bit.ly/3jrzL10

WE ARE HAPPY TO RECEIVE FEEDBACK ON OUR SOCIAL MEDIA CHANNELS SUCH AS FACEBOOK, YOUTUBE AND INSTAGRAM.

QUALITY ASSURANCE TO MEET EXTREMELY HIGH STANDARDS

We hold our products to high standards. In order to claim the leading market position for bike computers and lighting systems, SIGMA SPORT puts its own devices to the test. SIGMA product managers test their prototypes in the course of extended tours in the Palatinate Forest.

But we don't just rely on the experience of our employee; we also ask our customers for their opinion as early as the development phase. Voluntary product testers work with our user experience team to subject the prototypes to a practical reality check. Thanks to their helpful feedback, which is directly made use of in the further development of products, they help us to make our products even more user-friendly.

But a few trips through the woods are not enough to take our products to their limits. A vibration machine takes the stress test to the maximum. The impacts normally withstood over the course of an entire year are simulated within one hour. The lifetime of bike computers or lights is also tested for regular use under extreme conditions.

Extreme conditions are also adjusted in the climatic chamber. In addition to cold, heat and moisture, all of our products are subjected to simulated changes in weather conditions. While it goes without saying that all of our products are also tested for their functions, aesthetic appearances and power consumption, it is worth mentioning that our lights undergo additional testing for illumination and run time.

Mass production only begins once all the tests have been passed. Before the goods are packaged by hand and sent to customers all over the world, quality assurance employees test random samples from each production batch.

SALES TOOLS FOR POINT OF SALE PROMOTION

SALES CHARTS

The laminated sales charts are a great sales tools that be fixed easily to the store shelf with the integrated chain. Providing customers with a quick overview of the many SIGMA models. Just let your your sales representative know that you need them.

AURA HANGTAGS

These point of sale hangtags are a great way to promote SIGMA front lights – compliant with German road traffic regulations (StVZO). The easy to follow icons will help your customers quickly and clearly identify the most important light features. Order our hangtags at no additional cost and let them increase your lights sales!

UFSB

The Universal Fast Setting Box (UFSB) enables you to set you customer data (age, body size, weight, bike size, etc.) in a matter of minutes and then transfer it to the bike computer wirelessly or via a cable.

The box can also simulate various computer situations, so it can be used to display the SIGMA bike computer graphically in a sales presentation.

The fifth-generation UFSB can be used to adjust and test the following models: SIGMA ORIGINALS, TOPLINE 2016 and 2012, and VDO series 2021.

BIKE COMPUTERS

FUNCTIONS:

- Current speed
- Distance
- Total distance
- Ride time
- Total ride time

FEATURES:

- Automatic start / stop*
- Watertight in accordance with IPX8
- Tool-free mounting
- UFSB-compatible

*PURE 1 ATS: 2 hours in stand-by mode.

PURE 1 / ATS

Finally, an easy to use computer that does not look like a toy! The PURE 1 not only looks great, but it is easy to read and even easier to use. The extra large display shows the 3 most important cycling functions (speed, trip distance, trip time) at the same time. Press the button once to see total value.

Item no. 03100

PURE 1 contents:
Bike computer (incl. battery),
bracket for cable models, magnet,
mounting material, operating instructions

Item no. 03102

BC 5.0 WR / WL

Both the wired (WR) version and the wireless (WL) version of the BC 5.0 offer the five most important functions in a very small space. Despite the compact format, the bike computer's display is large and therefore easy to read with multiple functions displayed as symbols or icons. The large button makes switching among the data quick and easy, even while riding.

FUNCTIONS:

- Current Speed
- Distance
- Total Distance
- Ride Time
- Clock (12/24h)

FEATURES:

- Displays functions using icons
- Predefined tire sizes
- Ride Time up to 100 h
- Adjustable scan mode
- Automatic start/stop
- Watertight in accordance with IPX8
- UFSB-compatible

Item no. 05210

BC 5.0 WR contents:

Bike computer (incl. battery), bracket for cable models, magnet, mounting material, operating instructions

Item no. 05211

BC 5.0 WL contents:

Bike computer (incl. battery), bracket for wireless models, ATS speed transmitter (incl. battery), magnet, mounting material, operating instructions

ACCESSORIES

BC 5.0 WR

00530 CABLE BRACKET 2032 (90 cm)		00532 CABLE BRACKET 2032 (150 cm)		00536 CABLE KIT 2032 (90 cm)		00537 MAGNET

FUNCTIONS:

- Current speed
- Average speed
- Comparison of cur./avg. speed
- Distance
- Total distance
- Ride time
- Total ride time
- Clock (12/24h)

FEATURES:

- Full text display with seven available languages
- Predefined tire sizes
- Automatic start/stop
- Watertight in accordance with IPX8
- UFSB-compatible
- Service interval adjustable via UFSB

BC 8.0 WR / WL

The BC 8.0 is a low-cost starter model available in both a wired version (WR) and a wireless ATS version. For cyclists who want the basic functions plus total ride time and average speed displayed on a large display, this model is the ideal companion.

Item no. 08210

BC 8.0 WR contents:
Bike computer (incl. battery), bracket for cable models, magnet, mounting material, operating instructions

Item no. 08211

BC 8.0 WL contents:
Bike computer (incl. battery), bracket for wireless models, ATS speed transmitter (incl. battery), magnet, mounting material, operating instructions

BC 10.0 WR / WL

With ten functions, the BC 10.0 measures the maximum speed and is therefore an invaluable companion for everyone who likes to occasionally live life in the fast lane. The temperature display is a bonus feature! The BC 10.0 is available as a wireless (WL) or wired (WR) bicycle speedometer.

Item no. 10210

BC 10.0 WR contents:
Bike computer (incl. battery), bracket for cable models, magnet, mounting material, operating instructions

Item no. 10211

BC 10.0 WL contents:
Bike computer (incl. battery), bracket for wireless models, ATS speed transmitter (incl. battery), magnet, mounting material, operating instructions

FUNCTIONS:

- Current speed
- Average speed
- Comparison of cur./avg. speed
- Maximum speed
- Distance
- Total distance
- Ride time
- Total ride time
- Clock (12/24h)
- Current temperature

FEATURES:

- Full text display with seven available languages
- Predefined tire sizes
- Automatic start/stop
- Data retention when batteries are replaced (settings and total values)
- Watertight in accordance with IPX8
- UFSB-compatible
- Service interval adjustable via UFSB

CADENCE

- Current cadence*

FEATURES:

- Full text display with seven available languages
- Predefined tire sizes
- Can be used for two bikes
- Automatic start/stop
- Data retention when batteries are replaced (settings and total values)
- Battery status indicator (computer head + transmitter)
- Workout statistics for 12 months
- Automatic bike recognition (only BC 12.0 WL, BC 12.0 WL CAD)
- Automatic pairing
- Backlight
- Watertight in accordance with IPX8
- UFSB-compatible
- Service interval adjustable via UFSB

* BC 12.0 WL CAD, optional BC 12.0 WL

BC 12.0 WR / WL / WL CAD

A special feature of the BC 12.0 is that it can be used for two bicycles. Another practical feature is the monthly summary of the totals so the rider can review their training over the year. The BC 12.0 is available as a wireless (WL) or wired (WR) version. If you want to display cadence, choose the BC 12.0 WL CAD.

BC 14.0 WR / WL / WL CAD

With its performance design, the BC 14.0 WR / WL / WL CAD is the ideal companion for the ambitious cyclist. The expanded altitude measurement functions include current altitude, altitude uphill, total altitude uphill, and maximum altitude. Two different bicycle profiles and the backlight illumination are additional features.

FUNCTIONS:

- Current speed
- Average speed
- Comparison of cur./avg. speed
- Maximum speed
- Distance
- Total distance (Bike 1/Bike 2)
- Ride time
- Total ride time (Bike 1/Bike 2)

ROX

DIFFERENT CHARACTERS. ONE FAMILY.

SIGMA is adding three new models to its range of ROX GPS bike computers. **ROX 2.0**, **ROX 4.0**, and **ROX 11.1 EVO** all feature a number of functions to support recreational and professional cyclists while touring or training.

ROX 2.0 and ROX 4.0 are equipped with an extra-large, easy-to-read display that enables recreational cyclists to focus on the main thing: having fun cycling. The ROX 11.1 EVO bike computer provides navigation and support to athletes in training with more than 150 functions, making it a perfect training partner for indoor and outdoor bike training. Data analysis on each device is very easy with the SIGMA RIDE app.

ROX 2.0

ROX 4.0

ROX 11.1 EVO

ROX 2.0

The ROX 2.0 bike computer can be positioned on the handlebars in a few easy steps. There is no need to mount cables or sensors.

Using GPS and GLONASS technology, ROX 2.0 locates the cyclist's position in seconds. Along with the two button, user-friendly operation, it allows a bike tour to be started immediately.

Item no. 01050

ROX 2.0 BLACK contents:
Bike computer, GPS mount, attachment material, USB-C cable, quick-start instructions

Item no. 01052

ROX 2.0 TOP MOUNT SET BLACK contents:
Bike computer, USB-C cable, OVER CLAMP BUTLER GPS, quick start guide

Item no. 01051

ROX 2.0 WHITE contents:
Bike computer, GPS mount, attachment material, USB-C cable, quick-start instructions

Item no. 01053

ROX 2.0 TOP MOUNT SET WHITE contents:
Bike computer, USB-C cable, OVER CLAMP BUTLER GPS, quick start guide

SIMPLE NAVIGATION

The ROX 2.0 bike computer can be connected to the komoot app on a smart phone. Turn-by-turn instructions can be shown as an arrow on the display or inside the Red Circle. This circle on the display is highlighted in color and shows the distance to the next turn-off as a colored bar.

SHARING WITH FRIENDS

The SIGMA RIDE app makes it very easy to share activities in your Strava feed and add photos and notes about your adventures. Tour data can also be shared with other sports communities and social media and such as komoot, TrainingPeaks, Facebook, and Twitter. Activities can also be easily communicated through messenger services such as WhatsApp.

LARGE DISPLAY

The ROX 2.0's high-contrast display with its 2.0-inch diagonal and extra-large numbers make it easy to read, even during a ride. With the free SIGMA RIDE app, the computer can be used to set customized display views in just a few clicks.

SMART NOTIFICATIONS

Smart notifications connect bikers to the outside world even during bike tours. Information about incoming calls and messages to the smart phone appear on the display.

E-BIKE READY

The ROX 2.0 is e-bike-ready and can be easily connected to many e-bikes. The GPS bike computer establishes a connection with the compatible e-bike system and shows the current assist mode, battery status, and light and other data on the display. A compatibility list can be found by following the link on page 62.

ROX 4.0

The ROX 4.0's high-contrast display with its 2.4-inch diagonal and extra-large numbers make it easy to read, even during a ride. With the free SIGMA RIDE app for smart phones, the computer can be used to set individualized display views in just a few clicks – up to six screens can be configured, each with three values. Current speed and time are shown continuously on the display.

Item no. 01060

ROX 4.0 BLACK contents:

Item no. 01063

ROX 4.0 HR SET WHITE contents:
Bike computer, USB-C cable, quick-start guide, R1 DUO transmitter and chest strap, OVER CLAMP BUTLER GPS

Item no. 01065

ROX 4.0 SENSOR SET WHITE contents:
Bike computer, USB-C cable, quick-start guide, R1 DUO transmitter and chest strap, OVER CLAMP BUTLER GPS, DUO MAGNETLESS SPEED, DUO MAGNETLESS CADENCE

SIMPLE NAVIGATION

The ROX 4.0 bike computer can be connected to the komoot app on a smart phone. Turn-by-turn instructions can be shown either as an arrow on the display or inside the Red Circle. This circle on the display is highlighted in color and shows the distance to the next turn-off as a colored bar.

UP WHERE THE AIR IS CLEAR

A true highlight of the ROX 4.0 is the integrated air pressure sensor. It uses barometric readings to provide bikers with reliable information about altitude and to determine inclines and declines, allowing the track to be recorded precisely. The ROX 4.0 can also call up a graphical altitude profile. The home altitude at the beginning of the tour can be calibrated automatically from GPS or set manually.

BEST MEASUREMENTS

External sensors such as speed, heart, and cadence sensors can also be connected to the ROX 4.0, so those who want even more data and greater precision can keep an eye on all of them if they wish. ANT+ or BLE is used to ensure maximum compatibility with all sensors.

E-BIKE READY

The ROX 4.0 is e-bike-ready and can be easily connected to many e-bikes. The GPS bike computer establishes a connection with the compatible e-bike system and shows the current assist mode, battery status, and light and other data on the display. A compatibility list can be found by following the link on page 62.

SHARE ACTIVITIES

The SIGMA RIDE app acts as an interface between bike computer and smart phone. BLE allows very fast transmission of ride data, which can then be read out in a clear format with the app and conveniently assessed. Activities can also be easily communicated through messenger services.

ROX 11.1 EVO

The bike computer's 150 functions support and guide athletes during training and leisure. The ROX 11.1 EVO delivers all data reliably and in real time. Its scope of function includes tracking speed and distance with GPS, measuring barometric altitude, navigating and completing workouts with Track or komoot, and compatibility with e-bikes, smart trainers, and external sensors. The integrated Crash Alert feature uses an app to send a notification to emergency contacts if the rider falls. Smart notifications inform the rider of incoming calls and messages during the ride.

PERSONALIZED TRAINING VIEWS

Four of up to 20 possible sport profiles are already pre-installed on the ROX 11.1 EVO. Cyclists can also create their own sport profiles and use the ROX 11.1 EVO on different bikes.

Six different training views with one to six data fields can be individually configured with the SIGMA RIDE app. Other screens for workouts, tracks, and navigation with komoot are also installed. An additional data page can be called up for connected FE-C smart trainers. The individual data fields can be highlighted in up to eight different colors, allowing a better overview and quicker readability for the individual ride data.

HIGH-CONTRAST COLOR DISPLAY

Navigation information and ride data can be read very easily on the 1.77-inch transmissive color display thanks to its outstanding contrast. The display is continuously lit and adjusts automatically to various lighting conditions thanks to its ambient light sensor. The display can be set to ten different brightness levels as the situation requires.

ARRIVE SAFELY

Athletes can navigate simply on the ROX 11.1 EVO with Track or the komoot app, leaving their smart phones in their pockets. komoot navigation instructions are shown on the ROX 11.1 EVO display as arrows. During the Track navigation, waypoints can be set to mark important locations.

Navigation with a track

Navigation with the komoot app

COMPREHENSIVE DATA ANALYSIS

How long, how fast, how high? Up to 100 hours of riding time can be stored on the ROX 11.1 EVO. Training data can be called up quickly at any time on the ROX 11.1 EVO, the SIGMA RIDE app or, after training, on a PC or MAC in the SIGMA DATA CENTER. This provides a perfect overview of training values and progress. The SIGMA RIDE app's sharing options enable athletes to let friends and teammates know about their successes.

E-BIKE READY

The ROX 11.1 EVO is e-bike-ready and can be easily connected to many e-bikes. The GPS bike computer establishes a connection with the compatible e-bike system and shows the current assist mode, battery status, and light and other data on the display. A compatibility list can be found by following the link on page 62.

SAFETY FIRST

The Crash Alert built into the ROX 11.1 EVO automatically detects a fall and gives the rider 30 seconds to confirm that everything is OK. If there is no confirmation, the SIGMA RIDE app automatically sends an SMS to previously selected emergency contacts and gives them the relevant GPS data.

STAY CONNECTED

Smart notifications connect bikers to the outside world even during bike tours. Notifications of incoming calls, messages, and e-mails appear automatically on the display. Short messages can even be read directly on the ROX 11.1 EVO.

INDOOR CYCLING TREND

The ROX 11.1 EVO is a real pro during indoor training as well. The bike computer can be easily connected to the smart trainer. This allows full use of the numerous training computer features. Trainer resistance can also be adjusted with the ROX 11.1 EVO.

EASY COUPLING

BLE and ANT+ make it extremely easy to combine sensors that measure speed, cadence, and pulse. The set contains the ROX 11.1 EVO with the new magnet-free speed and cadence sensors. The ROX 11.1 EVO allows coupling with the power meter and electronic shifting.

Speed measurement	SRAM-eTap-compatible
Cadence measurement	Shimano-Di2-compatible
Heart rate measurement	Smart Trainer (ANT+)
Watt measurement with power meter	

SHARING WITH FRIENDS

The SIGMA RIDE app makes it very easy for bikers to share activities in their Strava feeds and add photos and notes about their adventures so that friends and followers can track them. Tour data can also be shared with other sports communities and social media platforms such as komoot, TrainingPeaks, Facebook, and Twitter. Activities can also be easily communicated through messenger services such as WhatsApp.

LUMEN/OPTICS/LUX

- The higher the lumen value, the more light is provided by the lamp
- Lux values give information about the brightness of a point in the lighting pattern
- The optics determine the distribution of the light output from the LED
- The more the optics focuses the light, the greater the Lux values are
- Good optics illuminate close-range, sides and long-range areas equally well

PUBLIC ROAD TRAFFIC

SAFETY ENSURED BY AN ANTI-GLARE LIGHTING PATTERN

- The front lights of the AURA series fulfil the same requirements placed on car headlights
- They ensure maximum road safety without blinding other road users
- They offer excellent long-range, close-range and lateral visibility
- Additional safety bonus: the lights of the AURA series stand out due to their very even light distribution thanks to high performance optics

BEAM RANGE: 40 m

FEATURES

- Effectiveness: 30 lux (15 lux in Eco mode)
- Beam range: 40 m
- Run time: 5 h in Standard mode; 15 h in Eco mode
- Splash resistant in accordance with IPX4
- Tool-free mounting
- Incl. batteries (2x AA)
- Two-stage battery indicator
- Weight: 69 g (incl. bracket, without batteries)

AURA 30

The AURA 30's 30 lux and 40-metre range makes it the perfect bike light for daily use in city traffic. It has StVZO approval and two light modes. Children and those who bike only occasionally appreciate its easy handling, long run time, and simple battery replacement.

AURA 35 USB

If you are looking for a compact, rechargeable front light with a strong beam range of around 45 meters, the AURA 35 USB is ideal for use on the road. The lighting elements on the side increase the safety additionally. This makes the light ideal for use in urban environments.

BEAM RANGE: 45 m

FEATURES

- Effectiveness: 35 lux (15 lux in Eco mode)
- Beam range: 45 m
- Run time: 5 h in Standard mode; 12 h in Eco mode
- Charge time: 2.8 h
- Switch on protection (double click for ON)
- Splash resistant in accordance with IPX4
- 360° adjustable bracket
- Tool-free mounting
- Integrated Micro-USB charge function
- Two-stage battery/charge indicator
- Charging possible during operation
- Weight: 90 g (incl. bracket)
- Improved side visibility
- CREE LED

AURA 45 USB

The AURA 45 USB illuminates the four zones up to a distance of about 55 meters with a rich 45 lux and a harmonious light pattern. Safety-conscious cyclists enjoy the integrated brightness sensor, which automatically adjusts the light intensity to the ambient light. This guarantees the longest possible run time.

AURA 60 USB

The sporty AURA 60 USB features 60 lux LED technology and, with a light range of 70 meters, ensures excellent illumination of pathways and roads. The Light Guide on the longitudinal sides also increases the lateral visibility of the rider. The AURA 60 USB is therefore ideal for commuters and demanding riders.

BEAM RANGE: 70 m

FEATURES

- Effectiveness: 60 lux (30 lux in Mid mode; 18 lux in Eco mode)
- Beam range: 70 m
- Run time: 4 h in Standard mode; 7 h in Mid mode; 10 h in Eco mode
- Charge time: 3.5 h

AURA 80 USB

With 80 lux and a powerful lighting range of over 90 metres, the AURA 80 USB front light ensures rider safety even far away from paved roads.

Thanks to its multi-level battery-charge and light-mode indicator, the rider is always able to see the remaining battery level and set light modes. This makes the AURA 80 USB a first-class companion for all ambitious riders.

AURA 100 / BLAZE LINK SET

With the AURA 100 / BLAZE LINK lighting set, the bike light can be controlled, customized and experienced in a completely new way. The highlight is that the front and rear light can be used as a connected set of lights. The AURA 100 LINK is SIGMA's most powerful StVZO front light thanks to its 100 lux brightness and 110 m beam range. In addition, the AURA 100 LINK has 4 lighting levels (25/50/75/100 lux) in manual mode, giving it a total run time of 12 hours

LIGHTS

BLAZE LINK

In addition to their basic lighting functions, the AURA 100 LINK and BLAZE LINK can be paired together as connected lights. When they are connected, every function of both the front and rear lights can be conveniently controlled via the AURA 100 LINK.

Brightness sensor

In the "Auto" lighting mode, an integrated brightness sensor automatically adjusts the light's power to the ambient light. This helps to maximize run time.

Battery indicator Mode indicator

The battery-charge and light-mode indicator provide easy-to-understand information about the remaining battery life and the light modes set on the AURA 100 LINK and the BLAZE LINK.

Three-LED brake light function

The BLAZE LINK's integrated acceleration sensor sends signals to three bright LEDs to indicate to other vehicles and bicycles on the road that the rider is braking. This feature is especially useful when a group of riders are traveling together.

		18460 USB-C-CABLE	

Lateral visibility

The BUSTER 150 has the logo on the longitudinal sides. It functions as a light guide so that cyclists are more visible from the side.

New silicone bracket

The integrated slider can be used to quickly push the BUSTER 150 up and down on the bracket. The power light can therefore be removed from the handlebars without the bracket and securely stowed in a rucksack.

USB-C charging

Thanks to the USB-C interface, the BUSTER 150 can be charged quickly. Only 2.5 hours are needed for the entire charging process.

BUSTER 400

The BUSTER 400 is the all-rounder for every occasion. With 400 lumens and a range of 120 metres, it provides the best possible view of nearby roads and pathways. Five light modes and a memory module ensure that the right amount of light is always available. The six-level battery indicator on the upper side show the remaining battery charge exactly.

BEAM RANGE: 120 m*

FEATURES

- Maximum light output: 400 lumens
- Beam range: 120 m*
- Five light modes: High (400 lm), Mid (200 lm), Low (100 lm), Night flashing (300/100 lm), Day flashing (100 lm)
- Run time: 2 h in High mode, 4 h in Mid mode, 9 h in Low mode, 5 h in Night flashing mode, 30 h in Day flashing mode
- Charge time: 3 h
- 360° adjustable silicone mount with quick release
- Tool-free mounting
- Switch on protection (double click for ON)
- Splash resistant in accordance with IPX4
- SIGMA light guide for outstanding visibility
- Five pre-set mode profiles
- Mode memory function
- Short button press shows the battery status
- Integrated USB-C charge function
- Six-stage battery indicator and five-stage charge indicator
- Charging possible during operation
- Weight: 107 g (incl. bracket)
- OSRAM LED

BUSTER 800 / HL

A whopping 800 lumens and a beam range of 170 metres make the BUSTER 800 a reliable partner for nocturnal cycling adventures. Precise LED indicators on the upper side of the power light show how much battery charge is left and which of the five light modes have been selected. There are two kinds of BUSTER 800: one can be mounted on the handlebars and one can be attached to the helmet (HL).

BUSTER 2000, battery pack, extension cable, charger, screw-bracket, helmet bracket, adapter for action camera bracket, remote control

BUSTER 2000 / HL

Turn night into day using the strongest power light ever made by SIGMA. The 2000 lumens produced by 3 CREE LEDs and the ultra-powerful battery pack make the BUSTER 2000 an amazing light for night rides and races. There are two kinds of power light: one for mounting on the handlebars and one for mounting on the helmet (HL).

Flexible mounting

Three mounting brackets are included with the BUSTER 2000. The silicone bracket can be attached quickly and without tools. The universal helmet bracket adapts to fit all conventional helmets. There is also an adapter that can be connected to action cam brackets.

Battery Pack

In the Panasonic cells built into the battery pack ensure an output of 6,400 mAh. The current charging status of the battery can be read using the four-stage indicator. A USB port can be used to charge additional devices such as bike computers or smartphones.

Remote Control

The BUSTER 2000 comes with a wireless remote control that weighs only 14 grams. This is especially handy when using the light on your helmet. The remote control attaches to your handlebars with an o-ring and can be quickly found at night as the buttons glow in the dark. It uses an interference free 2.4 GHz transmission signal.

LIGHTING SYSTEMS
REAR LIGHTS

VISIBILITY RANGE: 400 m

FEATURES

- 400 m visibility range
- Run time: 29 h
- Tool-free mounting with flexible silicone mount
- Incl. batteries (2x AAA)
- Side visibility
- Two-stage battery/charge indicator
- Splash resistant in accordance with IPX4
- Weight: 27 g (incl. bracket, without batteries)

CURVE

A chic design at a reasonable price: the CURVE battery rear light with its extra-long run time (29 hours) has unrestricted StVZO approval and will spice up the rear of every seat post with sporty aesthetics.

NUGGET II / FLASH

Small, compact and rechargeable. NUGGET II / FLASH is the reliable and cost-efficient taillight with very good visibility all around.

VISIBILITY RANGE: 400 m

FEATURES

- 400 m visibility range
- Charge time: 2 h
- Tool-free mounting with O-ring bracket
- Integrated Micro-USB charge function
- Side visibility
- Two-stage battery/charge indicator

BLAZE / FLASH

With a light range of about 500 meters, the brake light function and the day mode, the rear light BLAZE / FLASH considerably enhances the rider's safety in road traffic. This primarily benefits frequent travelers such as commuters and athletes. In addition, the rear light inspires with an extremely low weight and sporty design.

VISIBILITY RANGE: 500 m

FEATURES

- 3 LED brake light function
- Day and night mode
- 500 m visibility range
- Charge time: 3 h
- Tool-free mounting with flexible silicone mount
- Integrated micro USB charge function
- Improved side visibility
- Battery indicator
- Splash resistant in accordance with IPX4

VISIBILITY RANGE: 1500 m

FEATURES

- 1500 m visibility range
- Five modes: High (25 lm), Low (5 lm), Day flashing (80 lm), Night flashing (15 lm), Eco flashing (5 lm)
- Run time: 2 h in High mode, 7 h in Low mode, 4.5 h in Day flashing mode, 6.5 h in Night flashing mode, 12 h in Eco flashing mode
- Mode memory function
- Short button press shows the battery status
- Charge time: 2 h
- Tool-free mounting with flexible silicone mount
- Integrated USB-C charge function
- 240 degree wide angle optics
- Three-stage battery indicator
- Splash resistant in accordance with IPX4
- Weight: 29 g (incl. bracket)

BUSTER RL 80

The BUSTER RL 80 provides a light output of up to 80 lumens and is therefore more than bright enough for tours during daylight hours. There are five light modes to choose from: High, Low, Day flashing, Night flashing and Eco flashing. A practical feature, especially for longer tours. Thanks to the USB-C interface, the rear light can be charged in a mere two hours.

BUSTER RL 150

With up to 150 lumens of brightness, the rear light convinces with a fantastic visibility range of 2,000 metres, the brake light function and five light modes for day and night. In the energy-saving flashing mode, the run time is a good 28 hours. The side window ensures that bike riders in city traffic are easy to see from both sides.

VISIBILITY RANGE: 2000 m

FEATURES

- 2000 m visibility range
- 2 LED brake light function
- Five modes: High (40 lm), Low (5 lm), Day flashing (150 lm), Night flashing (25 lm), Eco flashing (5 lm)
- Run time: 4 h in High mode, 20 h in Low mode, 6 h in Day flashing mode, ≤ 7 h in Night flashing mode, 20 h in Eco flashing mode
- Mode memory function

E-BIKE SERIES

E-BIKE COMPATIBILITY LIST

Information about ROX and EOX® series compatibility with many e-bike system can be found at goto.sigmasport.com/eox-ebike-comp or by scanning the QR code with a smart phone.

EOX[®] VIEW 1300

With its flat design, the cable-free EOX[®] VIEW 1300 fits discreetly into the overall image of the e-bike and ensures a clean looking cockpit. It's equipped with a long-life battery. This allows it to be rotated out of the mount like a regular bike computer. The high-performance ANT+ and Bluetooth interface ensure a secure data connection. The three buttons at the bottom make the e-bike computer easy to use. The transfective FSTN display ensures ideal readability even in direct sunlight. An integrated sensor automatically adjusts display brightness relative to the ambient light. The EOX[®] VIEW 1300 can communicate with the EOX[®] app via BLE.

HIGHLIGHTS:

- E-bike functions* (Assist Mode, range, speed, battery charge level, power produced, power comparison (power produced and motor power), cadence, light status (full/dimmed beam), gear indicator and change recommendation)
- Heart rate (with the BLE chest strap) and training indicator
- Calories burnt
- Segmented FSTN display
- Navigation with komoot turn-by-turn instructions
- E-system and smart phone connection, time, and date
- Backlight
- (optional) remote control with EOX[®] Remote 500
- Customization with the EOX[®] app

* Function availability is dependent on the e-system connected.

PRECISE POSITIONING

The OVER CLAMP BUTLER offers perfect EOX[®] VIEW 1300 alignment, even on short stems – then the computer head can be positioned centrally above the stem at the level of the handlebars. This maintains a clean and uncluttered cockpit. The Butler fits handlebars of 31.8 and 35 mm diameters.

EOX[®] APP

The EOX[®] VIEW 1300 can communicate with the EOX[®] app via BLE. The EOX[®] app offers analysis and customization options. The app can then be used to specify which trip data is displayed on the EOX[®] VIEW 1300. Numerous social media channel integrations are available, so ride data can be shared anytime, anywhere. More information about the EOX[®] app can be found on page 80.

WEARABLES

PC 15.11

The circular shape says it all: the PC 15.11 not only counts calories, but also the laps that the athlete covers. At the press of a button, the intervals can also be viewed during training.

Item no. 21514
GRAY

PC 15.11 contents:
Heart rate monitor,
analogue chest belt

FUNCTIONS:

- Current, average and maximum heart rate
- Lap counter (50 laps)
- Target zone with zone indicator
- % of training time in zone
- Intensity zones
- Calorie counter
- Zone alarm
- Stop watch
- Clock
- Date

FEATURES:

- ECG-accurate*
- Backlit display
- Full text display with 5 available
- Watertight in accordance with 3 ATM**

*Compatible chest strap required
**Do not push the button under water

iD.GO

Anyone looking for an easy to use sport watch with heart rate functions should consider the iD.GO. It has an attractive design with a large display and comes with a chest strap that measures heart rate as precisely as an ECG. With only one button, the watch is extremely easy to use and is available at a very attractive price.

iD.RUN HR

The iD.RUN HR is the ideal training companion for the recreational runner or for training for the next half marathon. Speed and distance are measured via GPS and the heart rate is measured by means of an optical sensor on the wrist. This makes a breast strap superfluous. In addition, the running clock provides an integrated activity tracker for daily motivation. A detailed evaluation of the training data is possible via the DATA CENTER or by means of NFC transmission via the SIGMA LINK app.

Item no. 24900

iD.FREE

The iD.FREE is a versatile multi-sport watch for outdoor athletes and adventurers. It impresses with a variety of sport profiles, GPS navigation and robust design. Outdoor enthusiasts will also enjoy barometric altitude measurement, exergames and crash alert. Thus, the iD.FREE leaves nothing to be desired.

Item no. 24100
GREY

iD.FREE contents:
Heart rate monitor,
USB cable,
SnapOn Bike Mount,
operating instructions

FUNCTIONS:

- 7 Custom sport profiles
- GPS
- Smart light
- Crash alert
- Track and komoot navigation
- Target zone training
- 6 training views with up to 3 values
- Current / Avg. / Max. heart rate
- Barometric altitude measurement
- Weather trends
- Personal Best
- Connection to external sensors via Bluetooth Smart and ANT+*
- Smart notifications
- Activity tracking including sleep analysis
- .FIT file format
- Detailed training assessment via LINK App and DATA CENTER
- Exergames including geocaching

FEATURES:

- High resolution display
- Waterproof to 5 ATM
- Wrist-based heart rate
- SnapOn Bike Mount
- Mineral glass display
- Rechargeable battery
- Interchangeable silicone wrist strap
- 3 watch faces

* Compatible sensors required

POCKET TOOLS

22

POCKET TOOL LARGE

22 tools for screwdriver professionals and the all-round care package on the road.

8

POCKET TOOL SMALL

Pocket Tool Small, these are 8 tools. Small, compact and therefore ideal for the trouser or shirt pocket.

POCKET TOOL SMALL
Item no. 63000

FEATURES:

- Phillips screwdriver
- Slot screwdriver
- Spanner T25
- 2.5 / 3 / 4 / 5 / 8 mm Allen key
- Dimension: 74 x 29 x 11 mm
- Weight: 76 g

17

POCKET TOOL MEDIUM

The average size includes 17 tools and should not be missed on longer trips.

POCKET TOOL MEDIUM
Item no. 63001

FEATURES:

- Phillips screwdriver
- Slot screwdriver
- Spanner T25
- 2.5 / 3 / 4 / 5 / 8 mm Allen key
- Chain rivet
- Spoke wrench for 4 nipple sizes
- 2 Tyre levers
- Bottle opener
- Dimension: 96 x 48 x 11 mm
- Weight: 125 g

POCKET TOOL LARGE
ITEM NO. 63002

FEATURES:

- Phillips screwdriver
- Slot screwdriver
- Spanner T20 / T25
- 2.5 / 3 / 4 / 5 / 6 / 8 mm Allen key
- 8 mm hex key
- Chain rivet
- Chain holder
- Valve key
- Spoke wrench for 4 nipple sizes
- 2 Tyre levers
- Brake pad tool
- Knife
- Bottle opener
- Dimension: 86 x 47 x 21 mm
- Weight: 184 g

DATA WORLD

APPS & SOFTWARE

SIGMA RIDE

THE PERFECT COMPANION

EXPERIENCE IT LIVE

Activities are recorded with the SIGMA bike computer and can be analyzed immediately in the Live screen. The route and current GPS position can be displayed on the map. Distance travelled, training time elapsed, and metres of altitude uphill are also displayed, including an altitude profile.

CUSTOMIZING THE DISPLAY

Individual training views can be set easily during a ride or one of the pre-programmed views selected.

The SIGMA RIDE app status display provides reliable information about values such as the current bike computer battery charge and how much storage space is still available for tracks and ride data.

COMPATIBILITY

The SIGMA RIDE app is compatible with numerous SIGMA bike computers including: ROX 2.0, ROX 4.0, and ROX 11.1 EVO.

An overview of all compatible models can be found at goto.sigmasport.com/ride-app/kompatible-geraete

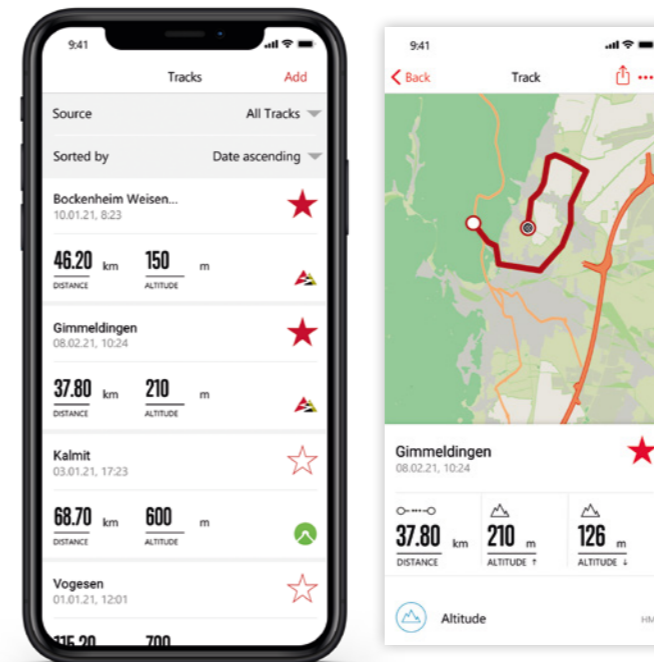

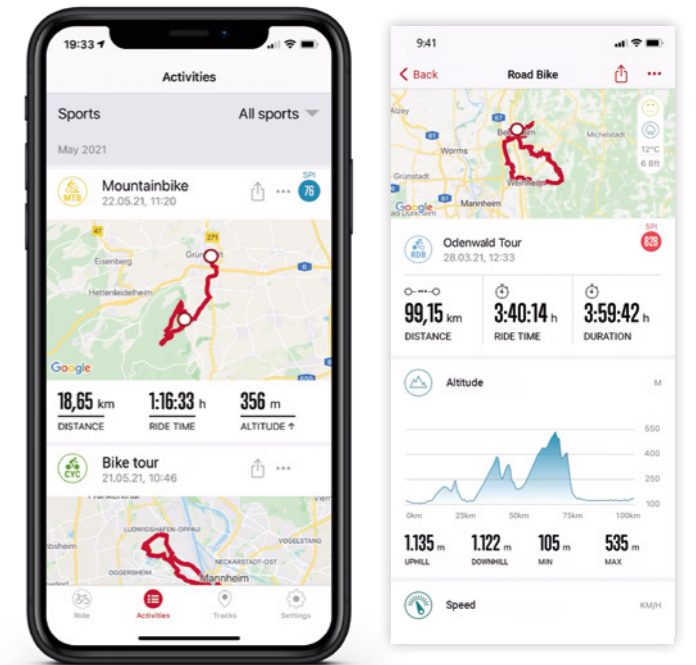

DOWNLOAD IT FREE!

ALL ROUTES AT A GLANCE

The SIGMA RIDE app enables cyclists to store all of their activities. The list view displays all tours with route, date, distance, ride time, and ascent/descent in an easy-to-read format. The most recent activity is always at the top of the timeline. The SIGMA PERFORMANCE INDEX can be used to visualise training intensity.

Specific details of each tour can be displayed in the activity screen. In addition to graphic profiles for each value (such as heart rate) a heat map with various colors shows performance along the route. Metainformation such as weather, temperature, and perception during the tour can be added to the activities.

FIND THE PERFECT ROUTE

SIGMA RIDE displays the best routes. They can be easily sent to the bike computer to follow immediately.

The SIGMA RIDE app can import tracks flexibly from other portals as .GPX files. SIGMA tracks, such as those created in the SIGMA DATA CENTER, can be synchronized in the SIGMA RIDE app via the SIGMA CLOUD. Tracks from third-party providers such as komoot can be made favorites in the app.

E-BIKE CONNECTIVITY

The SIGMA RIDE app is, of course, e-bike-ready. Graphic profiles and heat maps use a variety of colors to visualize how much of the route was ridden with what support level, the battery status over the course of the route, and much more.

SHARING WITH FRIENDS

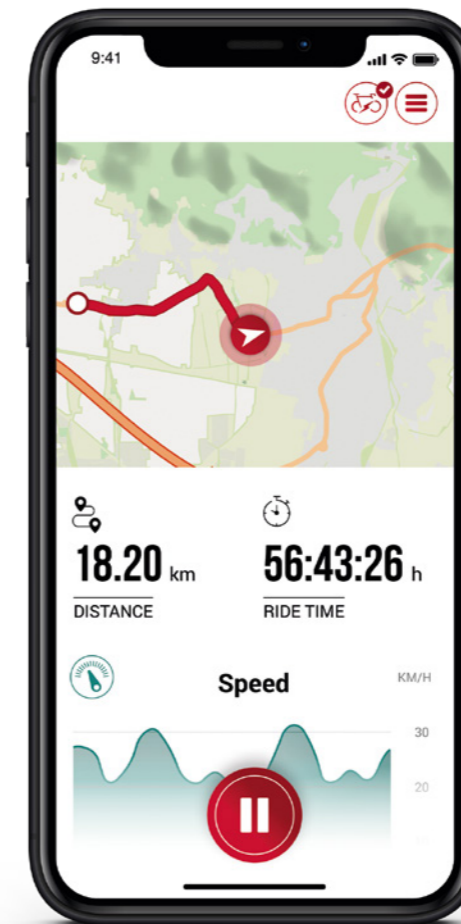

The SIGMA RIDE app makes it very easy to share activities in your Strava feed add photos and notes about your adventures. Tour data can also be shared with other sports communities and social media platforms such as komoot, TrainingPeaks, Facebook, and Twitter. Activities can also be easily communicated through messenger services such as WhatsApp.

SIGMA EOX[®]

THE SIGMA EOX[®] APP IS PART OF THE SIGMA SPORT SOFTWARE WORLD AND COMPLEMENTS THE E-BIKE PRODUCTS WITH OTHER SMART FEATURES.

TRACK LOG

The app records all trips on the e-bike so that saved trips can be viewed and analyzed in detail.

CUSTOMISATION

The screens of the EOX[®] VIEWS can be customized with the app. Elements can also be shifted in the track log view.

SETTINGS

The EOX[®] app can be used to adjust the e-bike compatible components. In addition, the user can also set targets by distance (weekly, monthly, yearly).

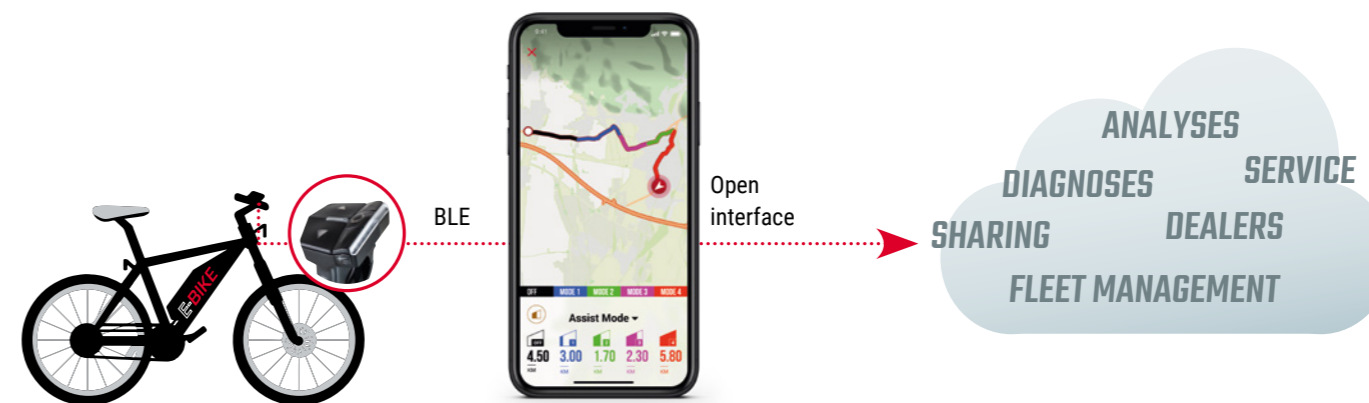

CONNECTIVITY & COMPATIBILITY

The app is compatible with all components of the EOX[®] series. In addition, a heart rate sensor can be connected via Bluetooth, and it is possible to share activities on multiple third-party portals such as Strava, Facebook and komoot.

CONNECTION TO THE DATA BACK END

The EOX[®] app can be connected to the data back end to analyze specific e-bike data, such as information on battery life, levels of support, or maintenance intervals. By cooperating with different providers, the back end can be adapted to individual customer needs.

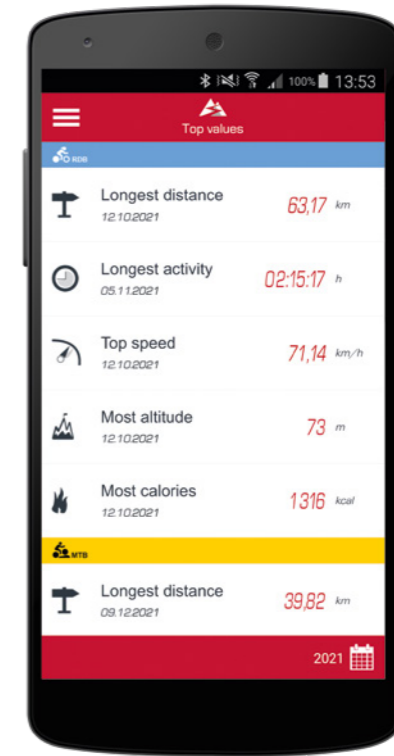

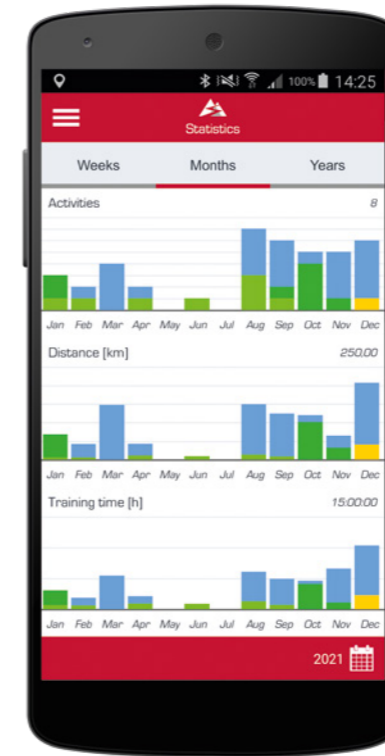

DOWNLOAD IT FREE!

SIGMA LINK

TRAINING EVALUATION ON THE ROAD

STATISTICS

Transferred training units are sorted by sport. Statistics can be displayed by week, month, and year, so that it is easy to identify periods of intense activity.

WHAT CAN THE SIGMA LINK APP DO?

With the app, trip data and device settings can be read out on the one hand and on the other, data such as settings or tracks saved in the app can be transferred to the bike computer. This works everywhere, even without data connection (map and GPS are not available offline).

Data sharing is also possible at any time. Due to the connection to various training portals like Strava, komoot, TrainingPeaks or even social networks such as Facebook and Twitter, one's own training results can be immediately shared. Planned or completed trips can be exchanged directly with komoot.

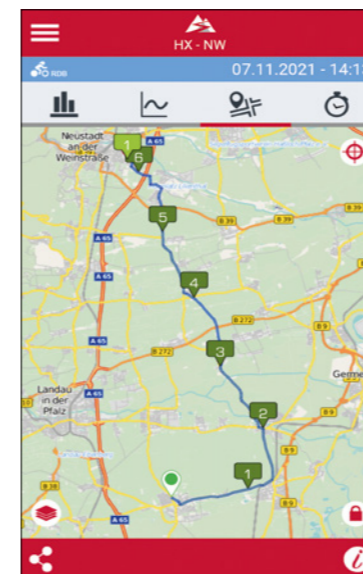

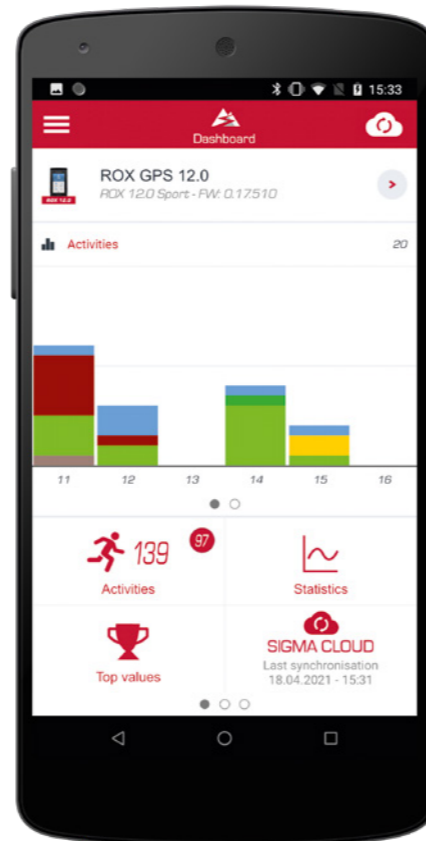

Another interesting feature is linking to Google Maps. This makes it easy and fast to navigate to the starting point of the track.

COMPATIBILITY

The SIGMA RIDE app is compatible with numerous SIGMA products including: PURE 1/ATS, ROX 12.0, iD.RUN, iD.TRI, and iD.FREE.

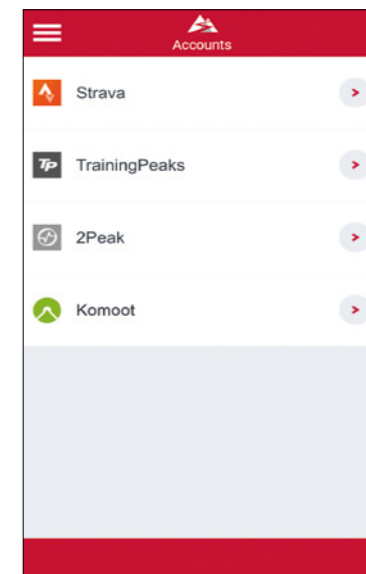

An overview of all compatible models can be found at sigma-compatibility.com

DOWNLOAD IT FREE!

TRACK VIEW

The app displays the route for each ride or run with a GPS device.

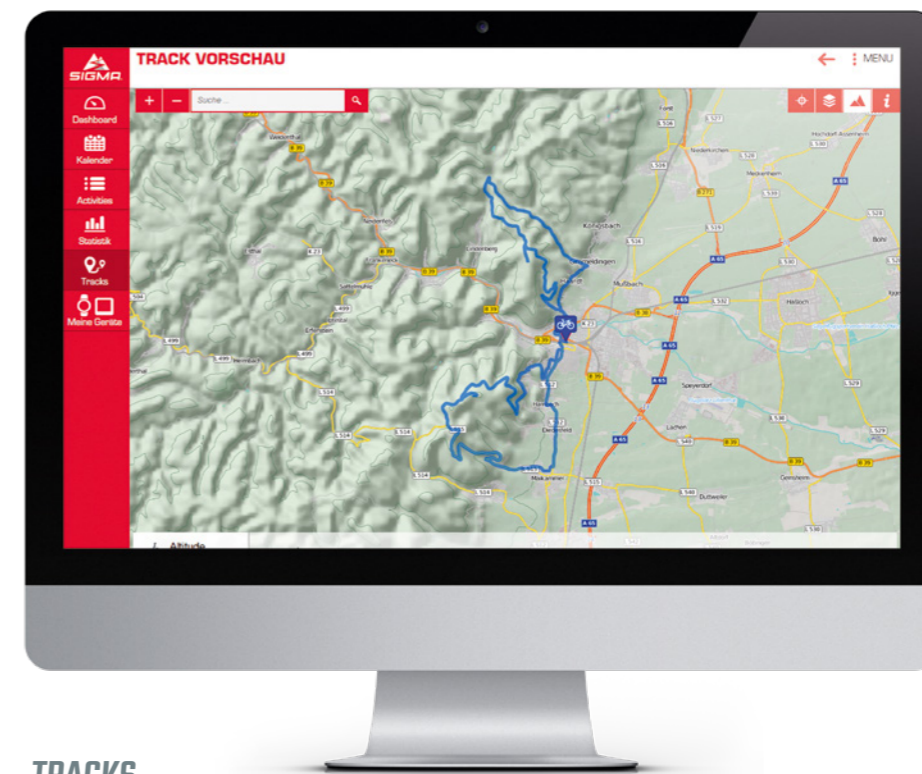

COMMUNITY

Routes and activities can be uploaded to and shared directly with third-party platforms such as Strava, TrainingPeaks, komoot, and Facebook.

DATA CENTER

SYSTEMATIC TRAINING EVALUATION AND ROUTE PLANNING FOR PC, MAC, AND TABLET

TRACKS

The DATA CENTER not only offers the tried-and-tested comprehensive training evaluation but now also comes with a map function and route planning.

DASHBOARD

The dashboard provides an overview of the connected device, the last training sessions, and statistics in extract form.

STATISTICS

Multi-device statistics give users a complete overview of all training sessions and types. Different display options and filters are possible.

ACTIVITIES

The log view shows all the training statistics at a glance, sorted by topic, and at the same time allows a graphical analysis of the training session.

SHARE

With just one click, the DATA CENTER can be used to upload activities to and share them on third-party platforms such as Strava, TrainingPeaks, komoot, and Twitter.

CALENDAR

The calendar overview displays the training sessions from either a week or a month or a year in the classic calendar view.

COMPATIBILITY

The DATA CENTER is compatible with numerous SIGMA products including: PURE 1/ATS, the ROX series, iD.RUN, iD.TRI, and iD.FREE.

An overview of all compatible models can be found at sigma-compatibility.com
